

## DETERMINACIONES.

Para ejemplares del Herbario de la Facultad Nacional de Agronomía,  
Medellín Colombia.

V. I

Febrero 1.949.

No. 1.

(Since insect damage to specimens not poisoned is very bad in this - region it has been necessary to distribute duplicates without determination. As these are received, will then be distributed to the herbaria which have received specimens. This is the first list issued in mimeographed form. Any errors reported from the list or suggestions made concerning a better form for reporting the material will be greatly appreciated.

F. A. B.

(Como el daño causado por los insectos a los ejemplares no envenenados es tan malo en esta región ha sido necesario distribuir los duplicados sin determinación. Inmediatamente las determinaciones se reciban aquí, serán distribuidas a los herbarios que hayan recibido ejemplares. Esta es la primer lista, y cualquier sugerencia que se haga en relación con una mejor forma para dar cuenta del material, sera altamente agradecida.

G. G. V.

ORCHID HERBARIUM OF OAKES AMES  
BOTANICAL MUSEUM, HARVARD UNIVERSITY  
OXFORD STREET, CAMBRIDGE, MASSACHUSETTS 02138

Feb. 11, 1966.

Dear Dr. Barkeley:

Herewith I am sending the determinations of the interesting collections which you sent to us recently.

Barkley & Willard 35465 - *Stelis argentata* Lindl.

" " 35464 - " *spathulata* Poepp. & Endl.

" " 35466 - *Pleurothallis undulata* Poepp. & Endl.

" " 35462 - *Elleanthus* sp. (No flowers in good condition)

" Montoya 35260 - *Oncidium halteratum* Lindl.

" " 36264 - *Epidendrum rostrigerum* Reichb.f. probably, (no  
anther present)

" Clark 35059 - *Listera Smallii* Wieg.

" Gutierrez & Arboleda<sup>35429</sup> - *Sobralia violacea* Linden ex Lindl.  
Probably (fls. agglutinated)

" Valderama 35237 - *Scaphyglottis leucantha* Reichb.f.

" " 35249 - *Epidendrum Steyermarkii* Hawkes  
(Synon. *E. matutinum* Reichb.f.)

" Arboleda & Castro 35385 - *Sobralia violacea* Linden ex Lindl. probably  
(Flower agglutinated)

" Montoya 36262 - *Elleanthus aurantiacus* (Lindl.) Reichb.f.

" " 35250 - " " " Flowers poor.

" Gutierrez Villigas 35345 - *Sobralia rosea* Poepp. & Endl.

" Willard 35461 - *Phragmipedium Schlimii* (Reichb.f.) Rolfe

" Montoya 35243 - *Epidendrum fimbriatum* HBK.

" " 35261 - " "

" Valderama 35275 - *Vanilla planifolia* Andr.

" Gutierrez Villigas 35384 - *Epidendrum secundum* Jacq.

" Torres-Romero 35341 - *Oncidium orgyale* Reichb. & Warsc.

" Gutierrez & Castro 35386 - *Epidendrum ibaguense* HBK.

Barkley, Gutierrez & Arboledo 35413 - *Epidendrum paniculatum* Ruiz & Pav.

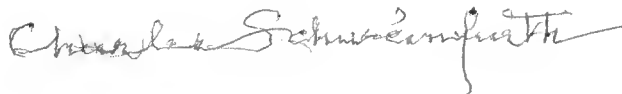

" & Valderama 35303 - Non-Orchid

" " 35302 - " " (Iridaceae?)

We give you our hearty thanks for the orchids. The two *Oncidiums* and the *Phragmipedium Schlimii* are most valuable.

On hearing from you, I shall return the two Non-orchids if you wish, or you may get them when you are in the neighborhood.

Sincerely yours,

A handwritten signature in cursive script, reading "Charles Schweinfurth". The signature is fluid and elegant, with a long, sweeping tail on the final letter.

Charles Schweinfurth

ORCHID HERBARIUM OF OAKES AMES  
BOTANICAL MUSEUM, HARVARD UNIVERSITY  
OXFORD STREET, CAMBRIDGE 38, MASSACHUSETTS

March 2, 1966.

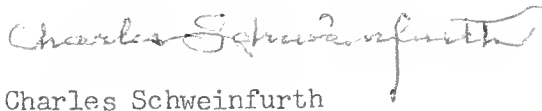

Dr. Fred A. Barkley,  
Dept. of Biology,  
Northeastern University,  
Boston, Mass.

Dear Dr. Barkley:

According to your suggestion, I referred your Iris and Lily to our Dr. Foster who specializes in these groups. He gives me the following determinations:

- NO. 35302 - *Orthrosanthus chimboracensis* (H BK.) Baker  
" 35303 - *Excremis coarctata* (Ruíz & Pav.) Baker

Yours sincerely and hastily,

  
Charles Schweinfurth

Botanical Museum, Oxford St., Cambridge, Mass.,  
July 12, 1966.

Dear Dr. Barkeley:

Herewith I give the names of the  
two orchids which you sent to us.

No. 35144 - *Oncidium luridum* Lindl.

No. 35083 - *Epidendrum cochleatum* L.

Hastily and sincerely,

Charles Schweinfurth

-----	------------------------------------

9 November 1967

Dear Bill:

Dr. Schubert gave me this list of Begonia determinations yesterday. They are all old collections and should be at the University of Texas. I thought you might like to check the determinations in the herbarium.

Cordially,

HAROLD N. MOLDENKE, PH.D.

Associate Professor, Department of Science  
Paterson State College, Wayne, New Jersey 07470  
Co-Editor and Publisher of "Phytologia"

TRAILSIDE NATURE AND SCIENCE CENTER  
MOUNTAINSIDE, N. J.  
FORMERLY CURATOR  
NEW YORK BOTANICAL GARDEN, BRONX, N. Y.

MAILING ADDRESS:  
303 PARKSIDE ROAD  
PLAINFIELD, N. J. 07060

December 12, 1967

Dear Fred,

Thank you so much for your letter of November 27th and the parcel of plants, and for letting me keep the verbs. No, I received NOTHING from the N. Y. Bot. Gard. of your plants! That is now typical of the administration there. If you want things to reach me, please send them direct to me at my home address -- 303 Parkside Road, Plainfield, N. J. 07060.

We are sorry that you and your good wife did not have such a happy visit to Mexico. Andy and his bride had a grand time traveling and collecting all over the country, down to the Guatemala line. I am still working on the identification of his specimens -- many are hosts of beetles.

I sent your Lamiaceae to Carl Epling, since he is the expert on the group, and asked him to report the names direct to you. I sent you a carbon of my letter to him for your files.

Now, here are my detss. for the verbs: [and the Ehretiaceae]

- 35199 -- *Duranta repens* L.
- 35397 -- *Lantana maxima* Hayek
- 35520 -- *Bouchea prismatica* var. *brevirostra* Grenz.
- 35399 -- *Lantana moritziana* Otto & Dietr.
- 35523 -- *Priva aspera* H.B.K.
- 37420 -- *Verbena brasiliensis* Vell.
- 36316 -- *Verbena stricta* Vent.
- 35398 -- *Stachytarpheta australis* Moldenke
- 35426 -- *Cordia toquere* Aubl.
- 35396 -- *Cordia cylindrostachya* (Ruiz & Pav.) Roem. & Schult.

Hoping that you and your family will have a happy Christmas and New Year season,  
I am, as always

your old friend,

Harold

# THE ACADEMY OF NATURAL SCIENCES OF PHILADELPHIA

JOHN W. BODINE  
PRESIDENT

15 Apr. 1968

H. RADCLIFFE ROBERTS  
DIRECTOR

Dear Fred:

Thanks for yours of the 9th. I'm sorry to learn that you've had a heart attack -- I hope it is well taken care of now so it won't happen again.

Your no. 38031 from Massapoag Lake is *Batrachospermum* sp. (probably *B. moniliforme* Roth, although the species there are like trying to distinguish bowls of jelly).

Belated Thanks for your specimens from Narragansett Pier, Rhode Island, received some time ago. The species:

- > 35001. *Ascophyllum nodosum* (L.) Le Tol.
- > 35002. *Enteromorpha Linza* (L.) J. Ag.
- > 35003. *Scytosiphon Lomentaria* (Lyngb.) J. Ag.
- 35005. *Gymnogongrus norvegicus* (Gunn.) J. Ag.
- 35006. *Chondrus crispus* (L.) Stackh.
- 35007. *Laminaria Agardhii* Kjellm.
- > 35008. *Porphyra umbilicalis* (L.) J. Ag.
- > 35009. *Scytosiphon Lomentaria* (Lyngb.) J. Ag.

All goes well here; I am busy revising more families of blue-greens and find life not so hectic as it was during the first 5 years here. Hal retired from teaching and has moved to Philly too.

With all my best and hoping you have a fine trip to Colombia,

At ever,

Francis Drouet

Dear Fred:

Herewith are my determinations of your plants:

- Barkley & Proctor 38712 -- *Mitreola sessilifolia* Torr. & Gray  
38623 -- *Tournefortia hirsutissima* L.  
38557 -- *Heliotropium curassavicum* L.  
38731 -- *Priva lappulacea* (L.) Pers.  
38465 -- *Tournefortia astrotricha* P. DC.
- Barkley 380164 -- *Paepalanthus pilosus* (H.B.K.) Kunth  
38882 -- *Paepalanthus crassicaulis* Körn.  
380750 -- *Cynoglossum amabile* Stapf & Drummond  
38908 -- *Lepechinia salviaefolia* (Kunth) Spling  
— 380079 -- *Lepechinia salviaefolia* (Kunth) Spling  
380297 -- *Tetrapteris calophylla* esp. *glabrifolia* (Griseb.) Cuatr.  
380198 -- *Arachnothrix reflexa* esp. *inconstans* (Standl.) Steyererm.  
38701 -- *Myriopus volubilis* (L.) Small  
— 380714 -- *Stachytarpheta cayennensis* (L. C. Rich.) Vahl  
— 38568 -- *Lantana trifolia* f. *hirsuta* Moldenke  
— 38678 -- *Cordia curassavica* (Jacq.) Roem. & Schult.  
— 380217 -- *Cordia curassavica* (Jacq.) Roem. & Schult.  
380494 -- *Petrea rugosa* H.B.K.  
38962 -- *Paepalanthus planifolius* var. *alpinus* Körn.
- Barkley & Mullen 38571 -- *Schobera angiosperma* (J. Murray) Britton  
— 38621 -- *Stachytarpheta jamaicensis* (L.) Vahl  
380144 -- *Paepalanthus paramensis* Moldenke  
380419 -- *Heliotropium fruticosum* L.  
— 380500 -- *Gonzalagunia cornifolia* (H.B.K.) Standl.  
380545 -- *Lantana tomasii* Moldenke
- Barkley & Bouthillette 38711 -- *Verbena scabra* Vahl  
— 380619 -- *Cordia bifurcata* Roem. & Schult.  
— 380073 -- *Lippia schlimii* var. *glabrescens* (Moldenke) Moldenke  
380168 -- *Syngonanthus glandulosus* Gleason  
380239 -- *Hyptis capitata* Jacq.  
— 38907 -- *Duranta mutisii* L. f.
- Barkley & Wrigley 38838 -- *Verbena litoralis* H.B.K.  
— 38794 -- *Cordia cylindrostachya* (Ruíz & Pav.) Roem. & Schult.  
— 38798 -- *Lantana rugulosa* H.B.K.  
— 38779 -- *Verbena brasiliensis* Vell.
- Barkley & Araque M. 380174 -- *Lantana maxima* Hayek  
380545 -- *Lantana tomasii* Moldenke

Two of the labels are marked "UNICATE". Does this mean that you want these two specimens returned to you? Please tell me, otherwise I'll keep them for inclusion in the sets of specimen I periodically distribute to Aarhus University in Denmark, Texas Research Foundation, Southern Methodist Univ., etc., etc. I do NOT deposit things in the big places anymore because I am convinced that in the next war they will be destroyed. So I for the past ten years or so have deposited things only in the smaller herbarium which are in smaller cities.

I have one more of your plants -- a milpighiaceae thing -- which I'll report later [someone has removed or misplaced all our Jamaican material of the genus!!]

Julian Steyermark sends you his best greetings. He has been working at NYBG for several past months.

With kindest regards and all best wishes from Alma and myself, I am,  
as always, your friend,

Harold

Dear Fred,

The following are identifications for the melastomes included in your recent shipment to the Smithsonian:

Barkley et al

- 38754 *Monochaetum hartwegianum* Naud.
- 36017 *Conostegia xalapensis* (Bonpl.) D. Don
- 38997 *Tibouchina longifolia* (Vahl) Baill.
- 38867 *Monochaetum myrtoideum* (Bonpl.) Naud.
- 380514 *Tibouchina* sp.
- 35104 " *lepidota* (Bonpl.) Baill.
- 380231 *Clidemia hirta* (L.) D. Don

Sincerely yours,

*John*  
J. J. Wurdack  
Curator, Dept. of Botany

20 August 1969

Dear Kamil:

Your letter saying that you had received my photograph arrived yesterday. I think that there are at least two letter after that on their way to you.

I am sending the letter on the reverse of this for you to file in the folder in my file cabinet marked "DETERMINATIONS". I think that it is the third drawer down from the top of the cabinet.

I have some geranium seed from some particularly beautiful geraniums. Would you ask Jean to plant them about ten seed to a five-inch pot when I send them to you?

Must prepare for my eight o'clock now.

Cordially,

Fred

November 10, 1969

Dear Fred:

Thanks so much for your nice card AND the extra-special postage stamps on it. Both are new for our collection!

The parcel of plants arrived and I've named up all except the legume -- that I've turned over to Dr. Rupert Barneby who is now the legume expert at the N. Y. Bot. Gard. If and when he reports the name I'll let you know.

My detts. are:

- Nelson & Barkley 39458 -- *Verbena litoralis* H.B.K.  
39478 -- *Lantana hispida* H.B.K.
- Barkley & Boghdan 39400 -- *Cornutia lilacina* var. *velutina* Moldenk.  
39404 -- *Priva lappulacea* (L.) Pers.  
39338 -- *Cordia boissieri* P. DC.  
39362 -- *Heliotropium phyllostachyum* Torr.
- Barkley & Nelson 39483 -- *Priva lappulacea* (L.) Pers.  
39477 -- *Schobera angiosperma* (J. Murray) Britton
- Boghdan & Barkley 39438 -- *Congea tomentosa* Roxb.  
39345 -- *Schobera angiosperma* (J. Murray) Britton
- Barkley 38729 -- *Stigmatophyllon cordifolium* Ndzu.  
39446 -- *Kallstroemia maxima* (L.) Hook. & Arn.  
39492 -- *Waltheria americana* L.

Trusting that you are having a happy time in Honduras, and with all best wishes to you and your wife from Alma and myself, I am, as always

Very sincerely

*Harold*

U. S. POSTAGE

SUPERFICIAL

Dear Fred:

August 8, 1970

Your two bundles of plants arrived while I was undergoing my second emergency lower abdominal operation. I was rushed to the hospital first on June 28 for a burst diverticulitis pouch and peritonitis; and then again on July 27 for a re-infection. I am told I was 15 minutes away from death. Now I am very weak at home to regain strength for the third operation in a month or two to take out the bad part of the gut and hitch me together again. If my 61-yr.-old body can take three shocks like this in so short a time remains to be seen.

Now as to you plants. I am sending you herewith the names for the verbs and eriocauls and one other which I recognize. What shall I do with all the rest that are non-verb and non-eriac? I no longer have the strength to identify plants not of my groups. Shall I send them to U.S. Nat. Herb. for you (where they would take their turn and it might be years before you get det.) or should I send them too Rogers McVaugh at U. of Mich.? As you know, he is much interested in Mexican and Cent. Am. flora and is building up his herbarium for that region. I'll hold them all here until I hear from you. Please reply air mail.

- Hernandez M. & Hernandez T. 5134 -- *Lantana glandulosissima* Hayek
- Barkley & Hernandez M. 40221 -- *Lantana hispida* H.B.K.
